Sound & Visual Check – Ensure a Proper Setup
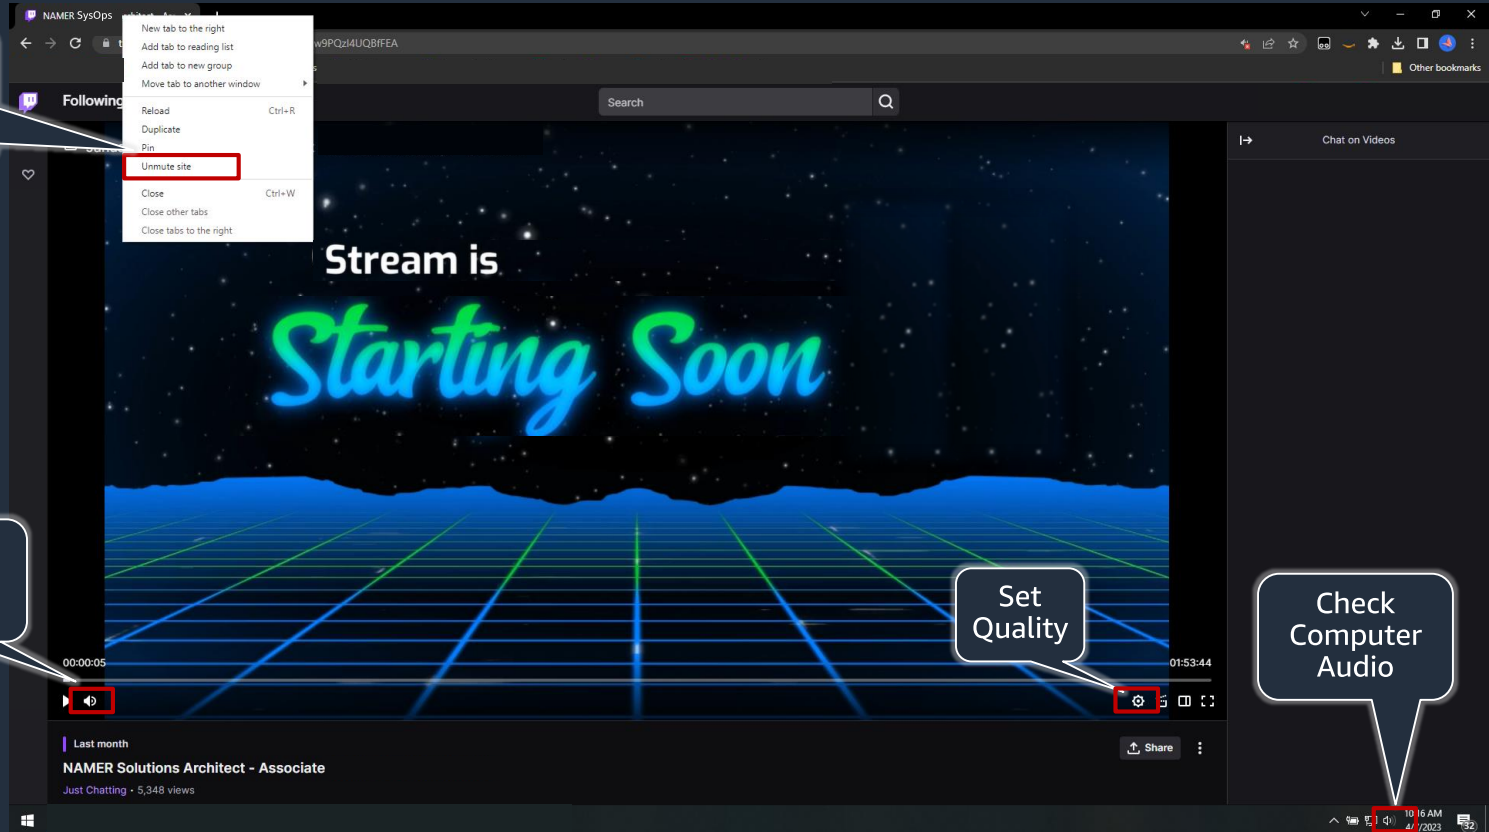

AWS Solutions Architect - Associate

Simplifying Your Certification Journey

September – October 2023

What is the Program?

Prepare for your AWS Certification in 5 Weeks!

- Aimed at providing you with the skills needed to become AWS Certified Solutions Architect – Associate!

- Includes structured learning opportunities each week with Digital Training, Virtual classes, Exam Strategy, and Content Review sessions.

- Participants can earn AWSome badges to share on social media.

Welcome to AWS Solutions Architect Associate Program!

SIMPLIFYING YOUR CERTIFICATION JOURNEY

WEEK 1
Sept. 11th – 15th

Introduction & Tech Essentials

- AWS foundations
- AWS Organizations
- AWS Storage Introduction

WEEK 2
Sept. 18th – 22nd

Networking and Storage Deep Dive

- AWS Storage Gateway
- Amazon EBS
- Security Groups & NACLs
- Networking Foundations

WEEK 3
Sept. 25th – 29th

Storage, Database, and Compute

- AWS Databases
- Amazon ElasticCache
- Auto Scaling

WEEK 4
Oct. 2nd – 6th

Data Analytics and Security

- Data Analytics services
- Security Fundamentals

WEEK 5
Oct. 9th – 13th

Serverless Architecture, Containers, and Monitoring

- Event-driven architectures
- AWS Fargate
- Amazon EC2 Systems Manager

Everything in free digital training, plus:

- Unlimited access to 125+ AWS Builder Labs
- Enhanced Exam Prep courses
- AWS Certification Official Practice Exams
- Premium AWS Cloud Quest Roles & Industry
- AWS Jam Journey

If you purchase the Skill Builder Subscription, enroll in the add-on Subscription Learning Plan.

AWS Partner: Security Best Practices

Course Description:

Provides an overview of some of the **industry best practices for using AWS security and control types**. Helps you understand responsibilities while providing guidelines for how to keep workloads safe and secure. You will learn how to **secure network infrastructure** using sound design options. You will also learn how to **harden compute resources and manage them securely**. Finally, by understanding **AWS monitoring and alerting**, you can detect and alert on suspicious events to help you quickly begin the **response process in the event of a potential compromise**.

COURSE MODULES

Module 1: Security Overview

Module 2: Securing the Network

Module 3: Amazon EC2 Security

Module 4: Monitoring and Alerting

Module 5: Course Conclusion

Security Best Practice Options

AWS Partner: Well-Architected Best Practices

Course Description:

The Well-Architected Framework **enables you to make informed decisions about your customers architectures** in a cloud-native way and understand the impact of design decisions that are made. By using the Well-Architected Framework, you will **understand the risks in your architecture and ways to mitigate them**.

This course is designed to provide a **deep dive into the AWS Well-Architected Framework and its 5 pillars**.

COURSE MODULES

Module 1: Well-architected Introduction

Module 2: Design Principles

Module 3: AWS Well-Architected Partner Program

Appendix

Joining the Amazon Partner Network

Required for Accessing Partner Training

The AWS Partner Network (APN) is the global Partner program for AWS.

It is focused on providing members of the APN with programmatic, technical, business, and go-to-market support.

When you register with APN, you will join a vast, high-growth network of software and professional service firms that offer a wide range of products and expertise to help customers take advantage of the AWS Cloud.

Step 1
Become a member
Join APN
Tell us your business interests and register using your business email address.

Step 2
Company Information
Tell us about your company
Help us understand your company. Provide information about your company and the nature of your company's business.

Step 3
Register Company
Accept terms and conditions
Register your company by accepting terms and conditions on behalf of your company.
